

DRILL PIPE AND KELLY WIPERS

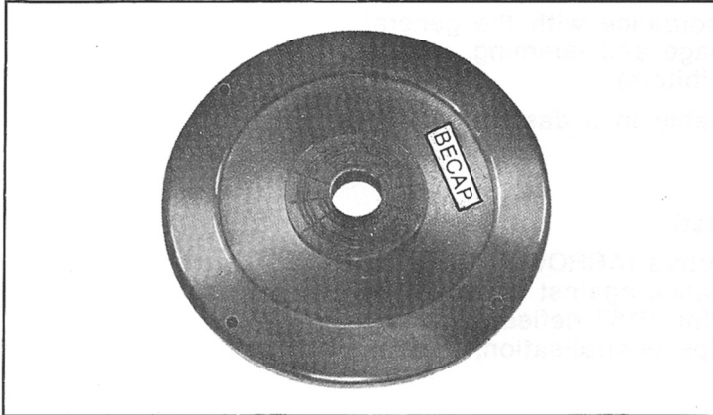

DRILL TYPE WIPERS

Available in the following sizes and design – FLAT STYLE – STANDARD TYPE.

A substantial steel reinforcing ring is entirely surrounded by molded rubber.

They provide the following advantages.

- Wipe drill pipe clean to prevent corrosion and improve handling safety
- Keep the derrick floor clean

- Oversized tool joints, protectors and small size stabilizers can be pulled through safely.

Available for 16" - 17" - 19" - 24" - 26" - master bushings.

The FLAT STYLE WIPER has a series of concentric rings molded in the inner wiping surface. Each ring carries the corresponding drill pipe size and the area of center hole to be cut out for a specific drill pipe size.

– DUAL SPLIT

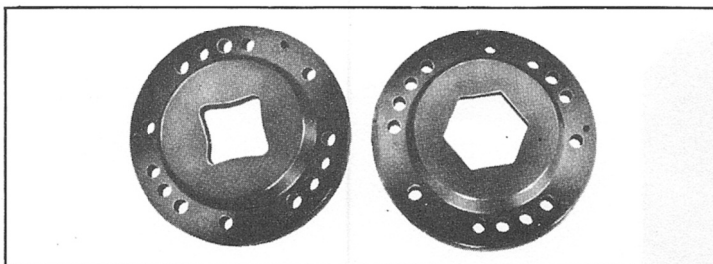

Molded in a single unit to provide a flexible double wiping action on drill pipe string.

They are split for easy installation.

Available for 17" and 19" Master Bushings.

KELLY WIPERS

They utilise the same tension wiping principles than BECAP drill pipe wipers.

Made of durable rubber molded over and bonded to a steel reinforcing ring.

- Sizes available for square kellys of following diameters : 3" - 3 1/2" - 4" - 5 1/4" - 6" and for 11 1/2" - 10" - 8 3/8" kelly bushings.
- Sizes available for hexagonal kellys of following diameters : 3 1/2" - 4 1/4" - 5 1/4" - 6" - and for 11 1/2" - 10" - 8 3/8" kelly bushings.
